

006 - Lockers on Campus

Proposer: Emma Stevenson – Representative for ICE

Union Notes

1. There are a small number of lockers available for students in the library
2. These are an incredibly useful service for students who live off campus
3. Students may not only have equipment for their academic endeavours, but also equipment for participation in sports or other extra-curricular activities

Union Believes

1. Many students don't currently know that these facilities are available
2. The lockers are not widely advertised
3. The university are highly unlikely to provide any more lockers unless the currently facilities are fully utilised

Union Resolves

1. To use our own avenues of communication to let students know about the availability of lockers
2. To ask the university and library to better promote the lockers
3. To ensure that if the currently facilities are being fully utilised that the President lobbies for more lockers to be made available
